Goals / Objectives

Objectives of Trust Net Solutions Company Limited

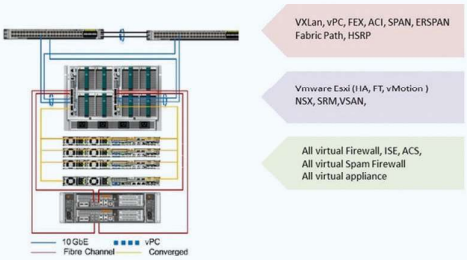
- Trust Net Solutions has been continuity in the professional engineers and skills workers.
- All of our customers will be satisfied with our solutions provided.

TRUST NET
SOLUTIONS

Company Profile

Critical Success Factor (CSF)

Trust Net have invested in below Cisco and VMware Lab room for training and workshop to achieve and sustain superior performance. We intended to focus on practicing Cisco Data Center and Unified Computing System.



Trust Net Solutions recruited and organized well-experienced Network Engineers and also have Cisco Certified engineers such as CCNA, CCNP and VMware engineers such as VCP Certified engineers, Peplink Certified Engineers and EMC Certified engineers.

Service engineers from IBM have been training our engineers once per month about new technology lab such as strategic Data Center, 7 layer security system, Change management about network policy and Engineer Operation Management System for SLA operations.

Having the strategic alliances is one of our CSFs in Fiber Infrastructure and Software Development fields.

Our proposed products are our strong and mutual relation with Trust Net as follow:

- Cisco
- VMware
- Peplink
- EMC
- NetApp
- Tyco Electronics AMP

What we offer

Data Center Facilities

An efficient data center requires the right people and processes. In the Critical Environment Facility industry, you can be assured we offer the best products and services. The ability of an enterprise to achieve its business goals depends on how effective the data center operates. TNS Data Center Facilities Service helps clients develop and maintain well-run data center operations. It is dedicated to guiding enterprises toward highly efficient capacity utilization and high reliability throughout the facility's lifespan.

TNS Data Center Facilities service provides you based data center management processes and procedures that promote the highest levels of capacity, availability and efficiency. TNS will also help you leverage the processes you have, identify operational gaps, and provide governance processes and procedures to help ensure that your data center facility delivers business value.

The final piece of the complete data center facilities services that TNS provides – helps our customers design an environment to meet you space, power, and cooling needs at the desired availability level.

TNS is uniquely positioned to provide you with these below services.

- We have provided data center turnkey solution with cost-effective strategy through the foreign factories.
- Those project managers who meet professional skills in Data Center Facilities Service - implement the whole project in the short time.
- We have provided operational assessments and consulting on a custom basis.
- We have successfully operated our own major data centers.

What we offer

Out Sourcing

We build IT capabilities that are more scalable, agile, reliable and responsive to business needs. Our infrastructure outsourcing services help clients reduce costs and gain efficiency, flexibility and scalability. We provide a model that allows them to move away from complex and inefficient IT environments. Most of infrastructure requires not only regular upkeep, but also new ways to do things better as well as more with less. Our outsourcing services can help clients for cost saving by reducing the scope, defining quality levels, re-pricing, re-negotiation and cost re-structuring. TNS can offer as the below points.

- To cut help desk costs, our desk outsourcing service helps clients reduce risk through multi-site support and introduce remote or self-service capabilities.
- To reduce total cost of IT ownership, our workplace outsourcing service helps clients provide a more secure and stable environment
- Data center outsourcing service helps reduce complexity, improve utilization, mitigate risks associated with staff turnover and reduce data center operating costs.
- To minimize network downtime and reduce network operating costs, our network outsourcing service helps clients establish a more secure and robust network infrastructure.

TNS Talented Outsourcing Services are as below:

- IT Support Onsite
- Service desk outsourcing
- System administrator Support
- Workplace outsourcing
- Network Outsourcing
- Data Center Outsourcing

What we offer

Data Center Infrastructure

TNS infrastructure offerings deliver the secure, flexible, and reliable IT infrastructure. It provides the necessary engineering support to right size your infrastructure.

- Improved data center scalability and privacy: Enhance scalability and adaptability of your data center with regular project mentoring for new technologies and consolidation and virtualization and also ensure data security, integrity, and reliability.
- Provided Software Defined Data Center (SDDC): Customized Disaster Recovery Solutions and Active-Active Data Center Solutions based SDDC emerged the technology of 21st century as our customers' need.
- Strategic alliances: We are a partner of Global Vendors likely Cisco System, VMware, Paloalto, Trendmicro, NetApp, EMC and Veeam and co-operate with them for business initiatives.
- Increased competencies: We intended to offer the best solutions fulfilling competencies to TNS engineer team. As a result of that, Server virtualization, Storage, Network and Virtual Desktop Infrastructure became TNS professional offerings.
- Increased business agility: Align data center infrastructure and associated capabilities with business goals to help translate overall business objective into tangible IT services specific to the data center.

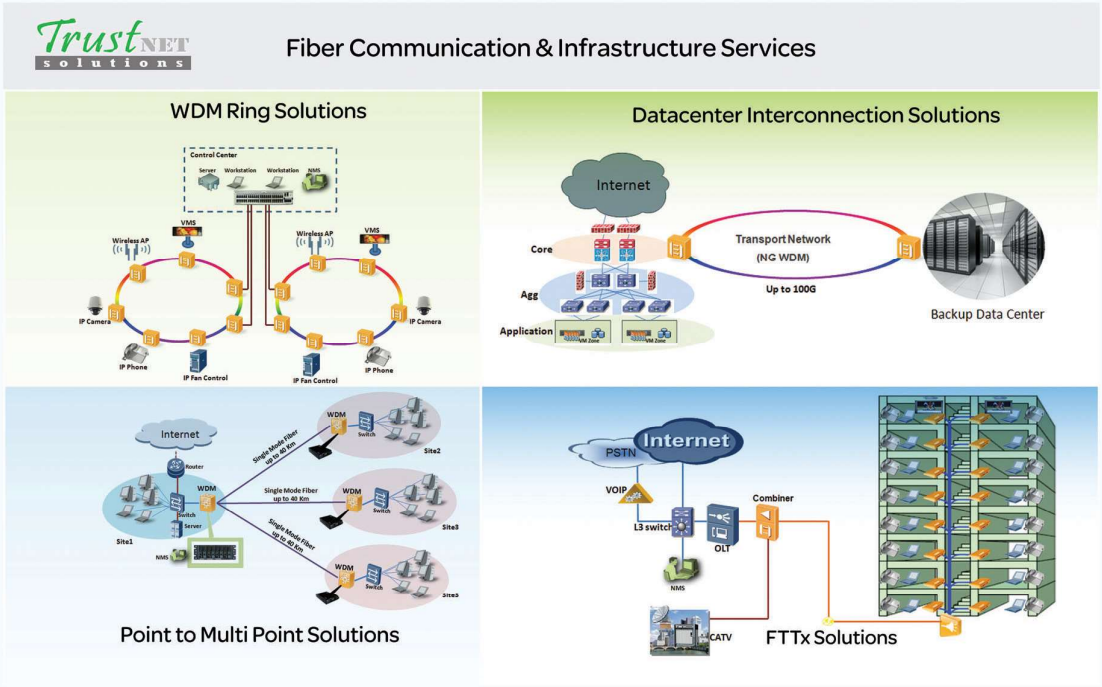
Future Objectives

In the future, Trust Net Solutions will be building Fiber ISP Network for B2B and co-operating with other ISP providers. Then we will be co-operating with software alliance companies to increase market share. We will be holding "win-win strategy" for our business growth.

Besides, TNS will have proposed Data Center Network Infrastructure projects with the way of cost-effective strategy. We will have been so many ways to achieve competitive advantages than others. TNS will be standing for the most trusted and reliable company in the local and regional markets for our customers and business partners.


Please see the appendices for the photos of some of our project experiences.
